Profile

Full Stack Developer with hands-on experience building scalable web applications using React.js, Next.js, and Node.js. Skilled in developing RESTful APIs, real-time systems, and database-driven applications. Experienced in AI-based solutions including Retrieval-Augmented Generation (RAG) and voice integrations. Passionate about writing clean, efficient code and solving real-world problems.

Skills

- Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Express.js
- Database: MongoDB, PostgreSQL, Prisma
- Languages: JavaScript, TypeScript
- Tools: Git, GitHub, AWS, Sentry, Clerk, Turborepo, Convex

Projects

- AI-Powered B2B SaaS Support Platform (Echo),**
Technologies : Next.js, React, Convex, Turborepo, Vapi (AI Voice), AWS, Sentry, Tailwind CSS, Clerk
- Built a multi-tenant B2B support platform featuring real-time AI-powered voice and chat agents.
 - Implemented Retrieval-Augmented Generation (RAG) to allow the AI to learn from product documentation, enabling context-aware responses without model fine-tuning.
 - Architected a Turborepo monorepo to efficiently manage shared packages across three distinct applications: the operator dashboard, chat widget, and developer embedding toolkit.
 - Integrated Clerk for organization-scoped billing and management, and Vapi for handling inbound and outbound voice calls.
 - Ensured production-grade reliability by implementing full-stack observability, session replay, and error tracking with Sentry.
- Real-TimeChat Application,** *Technologies : React.js, Node.js, Express.js, MongoDB, Socket.io*
- Developed a full-stack real-time chat application with secure user authentication using Socket.io.
 - Integrated MongoDB for storing user data and chat messages.
 - Implemented profile management, including profile picture updates.
 - Added dark/light theme toggle for better user experience.
 - Built a responsive UI with React.js and a scalable backend using Express.js.
- FleetFlow – Fleet Management System,** *Technologies : Next.js, TypeScript, PostgreSQL, Prisma*
- Built a role-based fleet management platform replacing manual logbooks.
 - Implemented authentication, API routes, and database integration.
 - Developed modules for vehicle, driver, trip, and expense management.

Education

- Bachelor of Computer Application,** 2021 – 2024
Lokmanya Institute of Management and Computer Applications
- Master of Computer Application,** 2024 – 2026
Lokmanya Institute of Management and Computer Applications

Languages

- English
- Hindi
- Gujarati
